## Cable

## PTFE, S2430, high temp

The thermal resistance of this high-temperature cable extends from $-190^{\circ} \mathrm{C}$ to $+260^{\circ} \mathrm{C}$. Due to its fully fluorinated jacket and wire insulation, the cable is perfectly suited for applications in high-frequency cables, as control cable in critical temperature areas, and in the computer-, and aviation industry. In addition, it stands out through a very good chemical strength, as well as its ozone- and weather resistance.
